Featured Project: Lemon Club Collective
Role: Full-Stack Developer | Designer | Architect
Stack: Node.js, Express, MongoDB, Solana
Web3, AWS, Stripe, Printify, PayPal
Highlights:

- Gamified Web3 Platform: Mint, evolve, and stake NFTs with full Solana integration.
- Multi-Payment Merch Store: Built an e-commerce store using Stripe, Coinbase, PayPal, and SOL.
- Dynamic Quests & User Rewards: Integrated custom quests and point system synced with user actions.
- Admin Portal: Includes user management, uploads, product listings, and dashboard analytics.
- Immersive UI/UX: Created parallax effects, interactive elements, and responsive design for a smooth and engaging experience.

<https://www.lemonclubcollective.com>

Core Features Built:

- User authentication with profile management
- Solana NFT minting with metadata evolution
- Staking logic with reward tracking
- Stripe / PayPal / Coinbase / SOL crypto payments
- Dynamic Printify-based merch catalog & checkout
- Quests and gamification system
- Admin panel with database management and S3 asset control

MATTHEW KOBILAN

Full Stack Web3 Developer

Professional Summary

Imaginative and driven Full-Stack Web3 Developer with a unique approach to building advanced digital experiences. Leveraging cutting-edge AI tools, I've independently created full-scale applications that rival agency-grade work. With a passion for innovation and a deep understanding of frontend, backend, and blockchain technologies, I can build scalable, engaging platforms from concept to deployment. Capable of delivering powerful user experiences, solving real-world problems, and bringing any vision to life through software.

Key Technical Skills

- Frontend: HTML5, CSS3, JavaScript (ES6+), Responsive Design, Canvas, Parallax Effects, React, Vue, Tailwind, Bootstrap
- Backend: Node.js, Express.js, Python (Flask/FastAPI), PHP, Ruby on Rails, MongoDB, PostgreSQL, REST & GraphQL APIs
- Blockchain: Solana Web3.js, Ethereum, EVM chains, Metaplex, SPL Tokens, NFT Staking & Evolution, Wallet Integration
- Payments: Stripe, Coinbase Commerce, PayPal, SOL, Web3 Payments
- 3rd Party Integrations: Printify, AWS (S3, SES, CloudFront), Google APIs, OpenAI, Email/Newsletter APIs
- DevOps & Infrastructure: Environment Config, CI/CD, Docker, CloudFront, Static Hosting, Error Recovery, Nginx

Additional Experience

Freelance Development (2025 - Present)

Built and launched full-stack platforms—like Lemon Club Collective—by blending entrepreneurial vision with AI-powered tools and fast-paced development.

- Delivered high-performance Web3 apps with NFT systems, payment integrations, and immersive UI/UX.
- Turned abstract ideas into polished, scalable software within tight timelines.
- Self-driven, highly adaptable, and capable of replacing a full dev team when needed.

 Let's Build Something Amazing Whether you're a startup, agency, or enterprise brand—I can deliver scalable solutions that blend creativity with cutting-edge tech. Let's collaborate to build apps, games, or platforms that bring your vision to life.
